National Center for Education Statistics

"The purpose of the Center shall be to collect and disseminate statistics and other data related to education in the United States and in other nations. The Center shall . . . collect, collate, and, from time to time, report full and complete statistics on the conditions of education in the United States; conduct and publish reports on specialized analyses of the meaning and significance of such statistics; . . . and review and report on education activities in foreign countries."--Section 406(b) of the General Education Provisions Act, as amended (20 U.S.C. 1221e-1).

Foreword

The National Center for Education Statistics (NCES), in cooperation with State education agencies, conducted the 27th annual fall survey of public elementary and secondary school systems. This report presents data on pupils, staff and public schools only. Data on estimates of public school finance and the 20 largest cities by population size will be available in two separate publications.

The information published herein is extensively used as a reference source by government agencies, professional and lay organizations and industry groups for planning, legislative development, and market research. In addition, the data are used by the press and other communication media to inform the public on the current status of public education in America. Many of these data are incorporated into other publications such as The Education Digest, The Statistical Abstract of the United States, and The Condition of Education.

Norman D. Beller, Assistant Administrator Division of Elementary and Secondary Education Statistics

A. Stafford Metz, Chief Institutional Surveys Branch July 1982

Acknowledgments

The data in this report were provided through the assistance of research and statistics personnel in each State department of education, the District of Columbia, and the outlying areas of the United States. The National Center for Education Statistics expresses appreciation to

the officials listed below and their staffs for their coopera-

tion in continuing to make this publication series possible.

Highlights

- Pupil membership in public schools decreased by approximately 594,000, or 1.4 percent, in fall 1980 compared with fall 1979.
- Public school membership in fall 1980 declined nearly 4.8 million since fall 1972 (the beginning of pupil membership decline).
- The pupil/teacher ratio decreased nationally from 19.0 pupils per teacher in fall 1979 to 18.8 in fall 1980.
- The total number of public schools in the United States in fall 1980 was 672 fewer than in fall 1979 and 2,344 fewer than in fall 1976.
- Approximately 2,184,000 full-time equivalency classroom teachers served public school systems in fall 1980, about 100 more teachers than reported in fall 1979.
- About 2.8 million pupils graduated from public high schools throughout the United States in school year 1979-80, representing around 72 percent of the pupils enrolled in the 9th grade 4 years earlier.

Introduction

This report provides basic statistics on public elementary and secondary school systems in each State, the District of Columbia, and outlying areas under U.S. jurisdiction, for fall 1980. Statistical data are presented on the number of public elementary and secondary school systems, pupils and staff, and high school graduates for school years 1978-79 and 1979-80. National trend data since fall 1954 on some items of information and fall 1976 on others are also included. Numbers contained in the Early Release entitled "Statistics of Public School Systems, Fall 1980" are revised in this publication.

Descriptions of survey procedure, other methodology, and coverage appear in appendix A. A replica of the report forms and instructions to respondents are shown in appendix B.

•		

Public Elementary and Secondary Schools'

In fall 1980, the Nation's State education agencies reported that 86,253 public schools educated pupils in elementary and secondary school education programs (table 1). This reflected a net decline of 672 public schools throughout the United States from fall 1979. California had the largest decrease, 121 schools, which represents 18

had the largest decrease, 121 schools, which represents 18 percent of all public school declines. This occurred even though the enrollment in California actually increased by almost 2 percent during the same period. The next largest decreases occurred in Kansas and Ohio, each having 79

fewer schools, and Pennsylvania with a decrease of 71 schools (table 1). These three States also had decreases in their enrollment in fall 1980, ranging from approximately 2 percent in Kansas to a little over 3 percent in Ohio. The following summarizes the relationship between school and enrollment changes for the States with the largest decreases

in number of schools since fall 1979.

Ohio	79	-2.0	-68,000	-3.4				

-1.9

-60,000

-3.0

Not all States had fewer schools in fall 1980 than i fall 1979. Alabama and Texas, for example, reported the largest net number of school increases, 75 and 60 respectively. In all, the net number of schools decreased in 2 States and the District of Columbia, increased in 20 State and did not change in 2.

From fall 1976 to fall 1980, a comparison of change in pupils enrolled with the net change in numbe operating schools showed that 31 States had decreased both pupils and schools. Among these States, the largest decreases in the number of public schools in the 4-3 time period occurred in Pennsylvania (440), California

and Michigan and Ohio (225). The following depicts decreases in the number of schools and pupils in the se States having the largest decreases since fall 1976.

High School Graduates

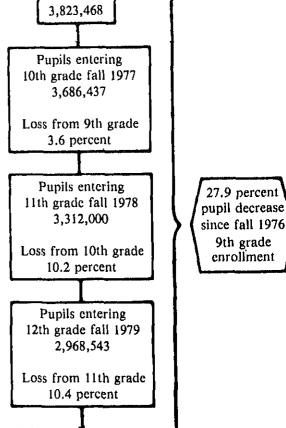

About 2.8 million pupils graduated from regular public high schools in 1980. This represents a decrease of about 60,000 pupils, or 2.1 percent, from the previous school year (table 8). The District of Columbia reported a decrease of 14.7 percent (the largest decrease of graduates among the States) compared to an increase of 12.1 percent for school year 1978-79. Other decreases ranged from 0.05 percent in Utah to 6.4 percent in Delaware. Female graduates outnumbered male graduates by slightly less

The ratio of public high school graduates in 1980 to the 9th grade class of fall 1976 was 72.1 percent. Public high school classes gradually lose pupils from year to year, resulting in a graduation class that is smaller than the 9th grade class 4 years earlier. Figure 1 shows the loss of pupils from one school year to the next, beginning with the fall 1976 9th grade enrollment.

than 2 percent.

High school equivalency certificates were awarded to approximately 488,000 persons in school year 1979-80, an increase of approximately 44,000 (10 percent) over the reported number awarded in 1978-79 (table 8).

Staff

etc.

In fall 1980, approximately 4.2 million full-time equivalency staff members were employed by public elementary and secondary school systems. This is a slight increase from 4,063,000 staff in fall 1979 to 4,192,00 in fall 1980 (about 3 percent). The largest number of staff were

professional educators, comprising about 2.3 million, or 56 percent, of all employed staff (table 9). Included in this category are classroom teachers, curriculum specialists, library/media specialists, guidance and counseling staff

The number of staff increased in each of the four ma-

and other teachers, e.g., those who teach by radio or TV,

jor categories from fall 1979 to fall 1980. Percent increases

occurred in "other professional" staff (20 percent), "official administrative" (6 percent), "nonprofessional" staff (7 percent), and "professional educational" staff (0.3 percent).

Several reporting jurisdictions were unable to report

Several reporting jurisdictions were unable to report nonprofessional personnel in fall 1980, so estimates based on previous years' data were used for those States (see appendix A).

Staff	Fall 1980	Fall 1979	Percent change	Number difference

increases and decreases in the number of classroom teachers were almost equal in fall 1980; teachers increased in 24 States and declined in 26 States and the District of Columbia.

The largest percentage increases in classroom

in the fall 1979 (table 10). The number of States reporting

decreases occurred in the District of Columbia (11.9 pe cent), New Hampshire (10.4 percent), Oregon (8. percent), Nebraska (8.3 percent) and Delaware (6.6 pe cent) (table 10).

For those States reporting the largest percentage in

teachers were reported in Wyoming (22.1 percent

Alabama (13.2 percent), Maine (9.6 percent), Utah (9. percent), and Georgia (8.1 percent), respectively. Large

crease or decrease in classroom teachers, the followir chart illustrates the relationship between the percent change in the number of teachers with the percent chang in enrollment in fall 1980. In most cases, where teachers in creased, pupils increased, and where teachers decreased

pupils also decreased. The only exceptions were Maine ar Georgia, who reported an increase of teachers and decrease of pupils.

## Appendix A

## Nature and Conduct of the Survey

ment has conducted a fall survey of public elementary and secondary schools assisted by education officials in the 50 States, the District of Columbia, and the outlying areas.

For the 27th consecutive year, the Federal govern-

This fall 1980 report is one of three publications relating to statistics on public schools.

The survey collects data on the numbers of schools,

pupils and staff in the public school systems. Before fall 1971, only statistics on classroom teachers (in full-time equivalents) were collected. From fall 1971 to fall 1974, the survey was expanded to include total instructional and

noninstructional staff, both professional and nonprofes-

sional. Since fall 1975, all information on all staff, by sex, was collected in four major classifications in accordance with Handbook IV, Staff Accounting. The survey also collects data on the number of high school graduates and the number of GED degrees granted in a school year. Data on high school graduates are extracted from Common Core of

Data (CCD), part IX, section II, and a portion of the GED data not reported by the States was extracted from *The 1980 GED Statistical Report*, General Education Development Testing Center of the American Council on Education, Washington, D.C.

Data are shown for each State and the District of Columbia, and, where necessary, estimates were made by NCES for missing data. Data are also shown for American Samoa, Guam, Puerto Rico and the Virgin Islands. Data for Commonwealth of the Northern Marianas and the

for Commonwealth of the Northern Marianas and the Trust Territory of the Pacific Islands were not received. Statistics for the outlying areas are shown separately and are not included in the national totals.

In some tables, national and State totals for fall 1979 are provided for comparison. Some of the data differ from that published in the early release entitled "Statistics of

IV, deals with public school pupil membership and staff part V with the number of public schools by type; and par IX, section II, cites the number of high school graduate from public schools. Copies of these survey forms ar shown in appendix B.

tency and for comparability with information previous

submitted. Letters, telegrams, and telephone calls were

Each State report was reviewed for internal consi-

used, when necessary, to obtain data from respondent and to resolve questions and discrepancies.

As in any mail questionnaire survey, interpretation

of instructions and definitions may vary among respondents. Because public elementary and secondary education is a State and local responsibility, any statistical total for the Nation as a whole reflects a composite of the different reporting practices in the States. The use of standard form

and definitions in collecting data tends to minimize thes

variations. Whenever State deviations from prescribe

definitions and instructions were known, they are in

dicated in the footnotes to the various tables.

Some States obtain the data for its report by conducing a fall survey of local school districts, using adaptation of the Federal forms and accompanying instruction. However, many States found this approach impractical for a variety of reasons (e.g., funds and staff not available for

conducting the survey, or similar data for a recent period may already be available at the State level). Some State have indicated that they collect the data from regular aroual reports, and a few States have indicated that they submit estimates based primarily on their records.

Some of the data shown in the basic tables may not seem to be sufficiently as the same of the data shown in the basic tables.

agree exactly with similar data reported in other NCE publications. Different reporting dates for various survey may have caused slight variations in published data. Also some of the data contained in this report are estimate made by the reporting jurisdictions.

NCES estimates were made for missing data in the nonprofessional personnel category (table 3). Based o

finding the ratio of the total ADM divided by the total average daily attendance (ADA) for all of the States that reported both ADM and ADA, then multiplying the individual State's ADA value by the ratio. This was done for each State that had not reported ADM values.

Formula:  $\frac{ADM \text{ total}}{ADA \text{ total}} \times ADA \text{ State} = ADM \text{ State}$

completed for each State, the District of Columbia, the outlying areas, and the 20 largest cities as determined by the 1970 Decennial Census. Data should be reported as of October 1, 1980 or the closest date thereto when the schools have become stabilized. If completed data for all local reporting units are not available in time for the completion of State aggregates included in this report, your best estimates are acceptable provided these estimates are comparable to pupil and staff data reported on Part VI - Local Education Agency Nonfiscal Report. Each entry that is estimated should be so indicated at the bottom of the form or alongside of applicable entry. If estimates (Fall 1980) are furnished at time of due date, please forward actual data when it becomes available. Also, please review data submitted for the previous year. If you reported estimates for fall 1979, actual data should also be forwarded at this time for staff and pupil membership revision purposes. Follow Handbook IV, revised, Classifications and Standard Terminology for Local and State School Systems, 1974, and Combined Glossary, Terms and Definitions from the Handbooks

The report is to be submitted on or before December 15, 1980. The report is to be

of State Educational Records and Reports Series, 1974, for definitions of staff.

### Full-time Equivalence

Section I, enter the number of staff by position assignment. Reporting should be in terms of full-time equivalence, that is the amount of time required to perform a part-time assignment expressed in proportion to that required in full-time position, with "l" representing one full-time position. Full-time equivalence is derived by dividing the amount of time employed by the time required in a corresponding full-time position. Please report in accordance with the following instruction:

- a. Include only filled positions; do not count vacant positions.
- b. Count part-time positions in terms of full-time equivalence. Full-time equivalence should be counted in tenths but the aggregate total for each line should be rounded to the nearest whole number. EXAMPLES: 1) A teaching position that is filled by two persons, each working a half-day,--count each at 0.5; 2) A teacher is employed for 2 hours per day-count at 2/6 or 0.3; 3) A teacher is employed 1 day per week--count at 1/5 or 0.2.
- c. A full-time employee having more than one assignment should be counted in each assignment. For example, a person assigned 4 hours per day teaching and 2 hours per day counseling should be counted 0.7 for teaching and 0.3 for counseling.

contained in Handbook IV, Revised Staff Accounting. This Handbook reference number and name of the activity assignment to be included in each line are defined below. Number of Pupils in Membership (as of a specified date) - The number of pupils entered

report on this line.

that a pupil will have been automatically dropped from the roll after a specified number

Unclassified - In cases where the level cannot be determined as elementary or secondary

include only those pupils whose prekindergarten and

kindergarten programs are part of the regular school

Elementary/Secondary: Pupils should be reported by

grade as "elementary" or "secondary" according to State and local practice, rather than on a K-8 and 9-12 basis. However, no pupils classified as "elementary" should be reported in grades higher than grade 8, while pupils classified as "secondary" should be reported in no grades lower than grade 7. It is possible to report some 7th and 8th graders as "elementary" and others as "secondary" if a single

classification system is not used State-wide.

Unclassified: Pupils not assigned to grades should also be reported as well as the exceptional and/or gifted pupils. Report handicapped pupils served by special education programs specifically designed to meet the needs of handicapped children (where hand)capped refers to either educable mentally retarded, trainable mentally retarded, hard-of-hearing, deaf,

speech impaired, visually impaired, seriously emotionally

disturbed, learning disabled, crippled, or other health-related handicaps). Pupils residing in the State-supported institutions should not be included. Report "Postgraduates," only those pupils who have graduated from the 12th grade and have re-enrolled for additional high school courses for purposes of entering college. Pupils enrolled in grades 13 and 14 are not

to be included.

The minimum number of days that schools are required to be in session with pupils in attendance as set forth by State regulation or law. Holidays and other days when pupils are not required to be in attendance should be excluded from this number.

Section III. State Minimum Number of Days of Regular School Term

on the roll of the school or school district as of the specified date. (This assumes

system and are financed by the LEA.

RETURN COMPLETED FORM TO:

A report is due in the National Center for Education Statistics, on or before December 15, 1980. The report is to be completed for each State, the District of

Decennial Census. Include only those schools operated by local educational agencies. If there is no entry for a field, leave blank. Avoid duplication of counting, e.g., do not count middle schools in line C and also include them in line B.

Columbia, the outlying areas, and the 20 largest cities as determined by the 1970

For purposes of this report, a school consists of a group of pupils with one or more teachers who give instruction of a defined type in one or more grades, housed in a school plant of one or more buildings or in more than one school plant, and organized as one unit. More than one school may be housed in the same school plant, as in the case when separately organized and administered elementary and secondary grade levels are housed in the same school plant; where this occurs, each level is considered as a separate unit. If both elementary and secondary grade levels are administered as a single unit, it should be considered as one school.

## <u>Specific</u>

Item A. One-teacher school - A school in which only one teacher is employed to teach all grades offered in the school, regardless of the number of rooms in the building. These schools can consist of any grade grouping within grades kindergarten through grade 12.

practice and composed of any span of grades not above grade 8. A preschool or kindergarten school is included under this heading. Include those schools not reported in lines A or C.

Item C. Middle school - A school which is separately organized and administered,

Item B. Elementary school - A school classified as elementary by State and local

usually beginning with grade 5 or 6 or its equivalent and including at least three grades or years. Most middle schools presume, in ultimate plan if not in present reality, a 4-year high school for the grades or years which follow, as in a 4-4-4 or 5-3-4 plan.

Item D. Secondary school - A school comprising any span of grades beginning with the next grade following an elementary or middle school and ending with or below grade 12.

item E. Combined Elementary/Secondary School - A separately organized and administeres school usually beginning with kindergarten or grade 1 and ending with or below grade provided it includes both elementary and secondary grades and is not classified as a

middle school.

Item F. Special Education School - A separately organized and administered school offering a program designed primarily to deal with the following types of pupil except

tionalities: (1) physical handicap; (2) emotional disturbance; and, (3) mental retardation. Such a school is attended exclusively by pupils exhibiting such exceptionality

the direction and management of an administrator for the purpose of offering education and training in one or more semi-skilled, skilled, or technical occupations. (Departments or other types of high schools which offer vocational and/or technical training are not to be considered as separately organized vocational high schools.)

Item G. Vocational/Technical School - A school which is separately organized under

Item H. Alternative school - A separately organized and administered school which is not an adjunct to or part of another school, and which provides a nontraditional educational program designed to meet needs of pupils which cannot be met in the

Do not include vocational schools offering services to adults only.

regular school.

[[]If any data item requested on this report is not available in SEA records or cannot be] [compiled from SEA records, enter "N.A." in the appropriate cell for each such item]

Educational Information, and Handbook 11, Financial Accounting in Local and State School Systems.

All data should be reported to the nearest whole number. In cases where the data are estimated such entries should be so labeled.

Definitions of items on this report are taken from Handbook I. The Common Core of State

Items 1.A-G are Handbook 1 definitions. The numbers in parentheses correspond to the handbook items:

IA.. (439) - Include pupils transported in buses or small vehicles whether transportations.

pupils who were transported by public carrier where the fare was paid from public school funds.

18., (440) - Include pupils transported in buses or small vehicles whether transportation was carried out under contract or by publicly owned vehicles. Also include pupils who were transported by public carrier where the fare was paid from public school funds.

was carried out under contract or by publicly owned vehicles. Also include

- ic., (442) Include the mileage of both publicly owned and privately owned buses and small vehicles. This item should be determined by multiplying two-way mileage of bus routes by the number of days the routes were traveled. One-way mileage of a bus route should be determined from the point the first pupil is picked up to the point where the last pupil gets off the vehicle. Do not include special excursions or transportation mileage between schools where pupils are transported from one school to another for different phases of their educational program. Do not include the mileage of public carriers
- unless they travel a special route for the purpose of transporting pupils only and this service is paid for from public school funds.

  10., (443) Mamber of school bus accidents in which children were killed or fatally injured.
- 1E., (444) Number of pupil deaths resulting from school bus accidents.
- 1F. 1-2, (415) - Number of publicly owned buses used in pupil transportation. - Include buse owned by local basic administrative units, intermediate units, and the Star
- 1G. 1-2, (418) - Number of school buses purchased during the year from public funds. - including the year by local basic administrative units, in termediate units, and the State for use in local district transportation.

The number of buses included here should also have been included in item 4 Therefore, the buses included here do not add to the total number of public

A. Report the total number of 1979-80 school-year high school graduates from the regular public day school program, including 1979 summer school. If 1979-80 graduates exceed the 12th grade membership reported for fall 1979, please explain.
B. Report the total number of graduates from other public school programs-evening school, adult school, etc.--during the 1979-80 school year.

High school graduates.

- c. Report the total number of persons receiving high school equivalency certificates during the 1979-80 school year.

  Dite: Items IIA IIB should also be prepared for the 20 largest cities by population
- size in accordance with the 1970 Decennial Census.

  Salaries.

  A-N.--Report contract salaries paid by local education agencies (not including employer contribution for fringe benefits) during the 1979-80 school year by type of assignment/function.
  - The categories of personnel in this section should correspond to those used for reporting personnel reported in CCD Parts IV and VI (Fall Report on Pupils and Staff). In completing this report, it is essential that the categories of personnel in Parts IV, VI and IX be identical.
  - In reporting salaries, show gross salary amounts--BEFORE deductions (from contract salary amounts) for social security, retirement, etc. See also explanations on pages 61-66 of Handbook 1. Do not include employer contributions for fringe benefits.
  - Please report all amounts to the nearest dollar. Cents are not to be reported for any item.
- Report total amounts spent by the local education agencies during the 1979-80
- Report total amounts spent by the local education agencies during the 1979-oc school year.

  A-E.--Report expenditures paid by the local education agencies in amounts to
- A-E.--Report expenditures paid by the local education agencies in amounts to the nearest dollar. Cents are not to be reported for any item.

  Include the total amount expended during the year for textbooks, etc., furnished free to all pupils in a school or in certain grades, including expenditures by the State or county for textbooks, etc., purchased for distribution to local basic administrative units. Do not include expendi-

tures for textbooks furnished free to indigent pupils only; these expendi-

Include all capital outlay expenditures of the school administrative unit whether from revenue or nonrevenue receipts, or from current or special funds. Rental or installment payments which ultimately result in the acquisition of property should also be included under capital outlay.

Debt service.

- B. Enter the amount spent by and for local education agencies for interest payments on bonds, and short-term and long-term loans during the 1979-80 school year.
- C. Enter the amount spent by and for local education agencies paid to school housing authorities during the 1979-80 school year.

Do not include monies borrowed and paid back during the same fiscal year or interest on short-term loans.
